

Arts & Scraps

Extended Programming

Overview:

- Arts & Scraps is continuing our Extended Programming, a dynamic educational initiative designed to foster creativity, critical thinking, and a love for math and science among students.
- These programs are offered in 6-12 week intervals and aim to provide students with a deep understanding of math and science concepts.
- Our curriculum is rooted in state standards, focusing on various units and branches of math and science.

Curriculum "Tracks":

- Clients and partners can choose from a selection of curriculum "tracks" tailored to specific topics, units, or branches of math and science.
- Each track is designed to help students learn a cluster of concepts, encouraging a comprehensive understanding of the subject matter.
- The curriculum is aligned with our educational philosophy, which emphasizes open-ended, creative learning to enhance both creative and critical thinking skills.

Key Objectives:

- **Enhanced Learning:** Our programs go beyond rote memorization and encourage students to explore concepts creatively, instilling a deep understanding of math and science.
- **Confidence Building:** By challenging students with interactive and creative learning experiences, we aim to boost their confidence in tackling complex subjects.
- **Lifelong Learning:** Our goal is to inspire a passion for math and science, empowering students to continue their educational journey with enthusiasm.

Impact:

- Through Extended Programming, Arts & Scraps seeks to transform the educational landscape by nurturing young minds to become confident, critical thinkers who are eager to embrace math and science.
- By blending creativity with traditional learning, we hope to ignite a lifelong love for these subjects and prepare students for a bright and successful future.

Join Us in Transforming Education:

- Your support and investment in Arts & Scraps Extended Programming will help us reach more students, make learning engaging and fun, and build a foundation for a brighter tomorrow.
- Together, we can inspire the next generation of innovators, problem solvers, and lifelong learners in the fields of math and science.
